President's Message
By Tom Telford

HELLO TO ALL,

Thanks to all the members who were present at the March meeting for you attention and participation in my program on the "Fast Approaching Future". I have discovered additional information concerning the content and will share some of that at the April meeting.

There is a really terrific site for those of you who are needing a source to learn how to use various programs. I would encourage you to visit "LearnFree.org". I have been using the site to learn more about Excel and about Power Point. There are tutorial's in the form of videos for a multitude of programs, which allows for the opportunity to pause and perform the functions on your own unit and then continue to additional instruction and exercise.

We continue to search for meeting programs and would welcome ideas from the membership on any suggestions they might have. The officers will make the contact with potential speakers, we just need membership input for subjects.

Please be aware of the meeting and help desk items and schedules, which appear in other sections of the newsletter.
